STEAM REFORMERS

NEW STEAM REFORMERS FOR SYNGAS & HYDROGEN PRODUCTION

Whether you are considering a licensor-designed reformer or a custom designed solution to meet specific process requirements, OnQuest has the capability to provide a full range of services from studies through design, supply and construction.

RETROFIT OF EXISTING REFORMERS

Regardless of the licensor technology, OnQuest has the capability to retrofit existing Reformer Furnaces for:

- Capacity expansion
- Efficiency improvement
- Increased reliability
- Emissions reduction
- Plant relocations
- Refurbishment

EMISSION CONTROL (BURNERS/SCRS)

Retrofitting an existing reformer with LoNO_x Burners or an SCR System requires careful evaluation of numerous factors including:

- Box geometry
- Operating parameters
- Flue gas / convection section configuration
- Layout and location of existing equipment
- Temperature windows for SCR installation

OnQuest has the experience and applied expertise for proven results.
