Zeeco's aftermarket products and services team

Zeeco is the world leader in aftermarket combustion products. We offer replacement components for our own superlative equipment, as well as competitors' parts, all at extremely economical prices. While our normal response and ship times are some of the fastest in the industry, expedited deliveries are our specialty.

Our products are only part of the equation. It is the people behind the products – engineers with extensive combustion experience – that elevate our aftermarket group from the role of a mere supplier to that of a true partner in your long-term success.

Replacement Flare Tips

Meet our combustion engineers.

There are salespeople. There are engineers. And then there are combustion engineers. You'll find more of the latter at Zeeco than anywhere else in the world.

Beyond a degree in mechanical or chemical engineering, Zeeco Aftermarket employees have also earned their stripes through extensive, hands-on problem solving in highly complex combustion applications. It's not enough to just know part numbers. We have the field experience and technical expertise to thoroughly support your combustion requirements from assessment to delivery, and then on through on-site training and service.

Off-the-shelf or engineered to order.

Simply put, we will replace ZEECO® parts or other OEM parts in-kind or better. Our aftermarket products are engineered, based on our extensive combustion experience, to be exceedingly effective and long-lived in the field.

Today, you may simply need a specific part delivered off-the-shelf, fast. We can do that. Tomorrow, you may need a new replacement part that is engineered to have a longer life and better performance in your unique environment. We can do that and more – quickly, efficiently, effectively, and easily.

Say goodbye to red tape. Say hello to your newer, better parts.

Beyond products and parts.

Often, once a part is shipped, our work has just begun. Zeeco offers training programs for every situation, from simple “lunch-and-learns” to multi-day, on-site training.

Over the past four decades, we have learned the true value of teaching operations and on-site maintenance specific to your facility. With Zeeco's training, you will gain invaluable knowledge and be able to determine if your equipment is operating as it was intended. You will also learn how to minimize downtime, which will guarantee your equipment is up and running faster. In addition, you will learn how to detect problems early to prevent costly repairs or lost production time down the road.

On-site service and more.

Zeeco also offers a full menu of services, including on-site refurbishing, burner cleaning, burner maintenance oversight, supervision of flare tip installation, and much more. We stand ready and willing to offer hands-on help whenever you need it, whether that involves cleaning and repair of our own equipment, our competitors' equipment, or both.

The Zeeco difference.

At Zeeco, we keep the flare-ups confined to your products – not your service. Our customers consistently tell us, across the board, we are friendly, responsive, and easy to work with.

Rapid Response Team

When you request a quote, you will have a response within 24 hours, and we will promptly prepare and submit your quote.

We treat every customer with the same responsiveness and respect, no matter what your size – from independent producers to international energy providers.

When you need us to visit you, we travel by car or book a flight – to any of the 100 countries we currently service. It is vital to us that we come to you, into the field, and see firsthand how your equipment is working. If we can find a way to better engineer it, to save you money in the long term, we want to do just that.

In the combustion business, we believe it's especially crucial to work closely with our suppliers, partnering with them to provide you with heroic turnaround times when you need them most. Our purchasing department works hand-in-hand with our sales and engineering department to make things happen, quickly. Our streamlined internal structure gives you faster access to anyone in the company, anytime.
